Hi All,

The tech/legal teams have meetings set up for 10 AM (1 PM) on Monday May 19 & June 2. Will those dates/times work for the managers?

Jayne

Subject: OR CZARA Forestry and Ag

Once the dust settles with NWEA over the extension (hopefully we'll have clarity by next week), I would like to meet with the team to scope out the key questions and approach for the review of the comments and the state's submittal. I'd also like to be clear on who is reviewing what and whether the team needs additional help and assistance.

I would also like us to consider and figure out the communications we should be having with the state so that they are clear about how we're approaching the review. The state needs to understand that we're looking at the materials (the record) that have been submitted during the public comment period and that our decision will be based on that package of materials and not materials, actions or other activities outside of that. We need to be clear about what we say to them if they decide to take some action or decide to put forward something between now and when we make our decision. While that may seem obvious, I don't think it is. I think we need to talk that through internally and communicate our plan to the state.

Ex. 6 - Personal Privacy

I would request that we have these internal meetings before then if possible. Thanks much all.
